**Email Hack
detected!**

iQ.Suite CyberDefense

Protect your email communication from WannaCry, Locky & Co.

More and more, data thieves and cyber terrorists are misusing email communication for their malicious purposes. Whether it's extortion, data theft or attacks on infrastructure, every threat demands a decisive response.

Danger is just a mouse click away

Conventional anti-virus and anti-spam solutions just aren't enough anymore! All it takes is one ill-placed mouse click for Trojans to invade your computer, encrypt vital data and demand ransom. Financial repercussions are significant, as seen in the recent and very successful WannaCry attacks.

Multi-level, well-targeted security solutions are the only answer. Such a solution not only sets hurdles for

attackers higher, conformance to regulations, such as IT security guidelines, is simplified as well.

iQ.Suite CyberDefense is the central email security solution for stopping cyberattacks in their tracks. Made in Germany.
