GBS FastAssessments
Helping to control risks in the workplace

- Do you still have a paper based Risk Assessment process?
- Do you regularly visit areas of the business to undertake assessments where there are little or no communication capabilities?
- Would you like members of your workforce to have the ability to create Dynamic Risk Assessments and record identified hazards right from their mobile devices to complement and support your master Risk Assessments?
- Would you like to be able to begin the improvement process and improve control measures right from the mobile device?

Streamlining your Assessment Process

Manual Assessments – can create huge amounts of paperwork which can take time to file and then retrieve, but more importantly this can take away the focus of identifying and controlling hazards in the workplace.

Paperless Solution – by the introduction of an electronic solution for Risk Assessments, teams are not only able to reduce both time and costs, but make information available quicker and easier to find.

Automated process – Once the assessment process is automated, the time required to plan, schedule and document a completed assessment can be dramatically reduced. Automated processes are more consistent and easier to manage and staff time is used more efficiently.

GBS FastAssessments – enables your team to carry out both traditional and dynamic risk assessments electronically and more importantly, offline. Let us to help you revolutionize your assessment process by combining the power of mobile technology with best practice methodology.

Action Tracker – Using the integrated Action Tracker, gives you and your team complete and real-time visibility on the lifecycle of any follow-on actions. Triggers and automated email notifications ensure everyone involved in the process becomes accountable and issues no longer go un-actioned.

Features

- Upload photos & video to support your assessment
- Provides a Library of standard assessments incl.: Fire / Manual Handling / Delivery Point Assessment
- Hazard scoring matrix with traffic lighting aids significant hazard identification
- Integrated improvements and action tracker
