- Storage of related metadata
- Revision safety with PDF/A
- Visual appearance is maintained
- Integration of original file attachments possible
- Permanent data integrity
- Good scalability for large volumes of data

How to retire unused IBM Domino applications efficiently

What to do with outdated IBM Domino applications?

Outdated, unused IBM Domino applications are a burden. Financial or personnel resources for administering applications or migrating to a new platform are either non-existent or severely limited. Often, modernising is an unrealistic endeavour because appropriate solutions are not available or budget and/or time requirements are prohibitive. Good news: Those times have finally come to an end!

GBS Retirement Manager – Shutting down efficiently

The GBS Retirement Manager turns retiring unused and outdated IBM Domino applications economically into a reality. The underlying methodology has been tried, tested and proven in practice, for complex as well as simple scenarios.

How it works:

- 1** Extract contents from existing IBM Domino applications
- 2** Convert extracted data to PDF and XML
- 3** Export to archive, file system or web browser
- 4** Shut down unneeded IBM Domino applications
- 5** Use the exported data in SharePoint, archive system etc.

GBS Retirement Manager & SharePoint Integrator

The efficient way to retire your IBM Domino applications

Benefits

- Rapid return on investment
- Reduced operating and licensing costs
- Budget available for other investments
- Automated, centralised processes
- Easy integration of IBM Domino data in SharePoint
- Retirement can be run on premises or in the cloud

About GBS

GBS is a leading provider of solutions and services for the Microsoft and IBM collaboration platform.

More than 5,000 customers and 4 million users worldwide trust in the expertise of GBS.

An economical and future-proof process

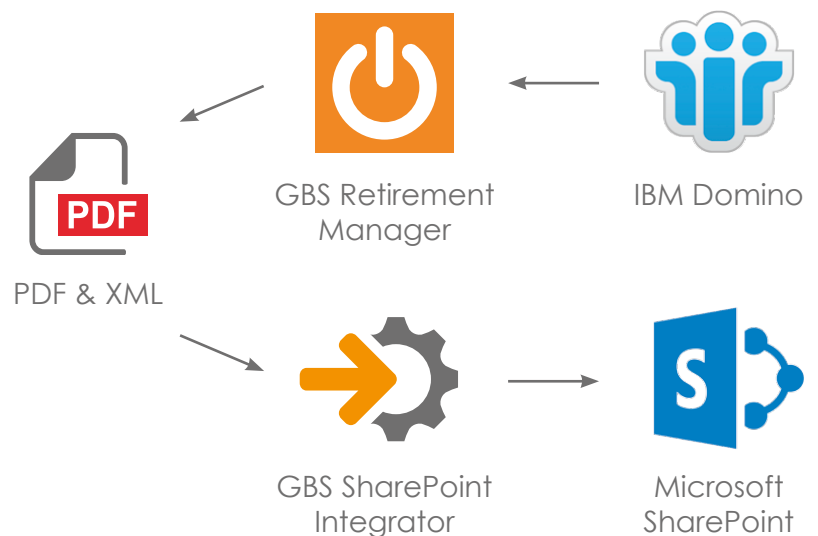

The entire process is based on automated procedures and the use of recognised standards such as PDF and XML, which makes it possible to use data platform independently. By the way: Complicated and time consuming analysis and cost intensive migration are things of the past. Thanks to parallelising, millions of data sets can be managed comfortably.

For customers, who emphasize revision security or have special compliance regulations, the Retirement Manager also allows conversion to PDF/A format.

GBS SharePoint Integrator – Smart integration

With the GBS SharePoint Integrator, contents in retired IBM Domino applications can continue to be used in SharePoint. The solution takes on the automated import of converted PDF and XML files directly to Microsoft SharePoint.

Subsequently, users can access this data in SharePoint lists or search contents, for example. Information in retired IBM Domino applications stays accessible.

Thanks to centralised and completely automated processes, you can retire outdated IBM Domino applications with the GBS Retirement Manager and GBS SharePoint Integrator confidently. Valuable data remains accessible and unnecessary expenses for operating and managing unused applications disappear.
