

# Professional SharePoint Services

## Your benefits

- Highly qualified SharePoint experts
- High economic efficiency
- Rapid availability
- Professional project management
- Extensive know-how from numerous and diverse projects

## Get the most out of your SharePoint investment

Microsoft SharePoint is the platform of choice for cross-team cooperation, content filing and managing business processes. Yet the enormous range of potential applications brings an enormous range of factors to bear in mind when implementing and managing precisely these applications.

## Consulting Services – from A to Z

GBS's professional services will help you manage the many facets of SharePoint successfully – from conception to operation to support. On premises or in the cloud: Our team of architects, consultants, software developers and support engineers has years of experience with SharePoint. Thanks to this pool of expert knowledge and our extensive know-how in platform development, we can minimise project risks and implement the optimal solution for you. That includes intelligent application design and SharePoint architecture made to fit your needs.

## Infrastructure Services

You're planning to introduce SharePoint? Would you like support in optimizing your existing infrastructure? Or do you have a migration project on the horizon? Whatever the challenge, we're here for your needs right from the start, safeguarding your success.

### Our services

- Conception and design of SharePoint infrastructures
- Analysis and improvement of existing farms
- Implementation of SharePoint  
*(Virtualisation, on premises, Azure, Office 365)*
- Integration of backups and disaster recovery
- Upgrades and migration  
*(On premises after cloud as well as cloud after on premises)*

# Professional SharePoint Services

Our experts know what matters

## Our expertise

- Comprehensive knowledge of SharePoint reference architectures
- Experience in customizing and individual development
- Cloud expertise  
(Azure, Office 365)
- Know-how in 3rd party applications and data integration
- Extensive experience with enterprise environments
- Best practice knowledge

## About GBS

*GBS is a leading provider of solutions and services for the Microsoft and IBM collaboration platform.*

*More than 5,000 customers and 4 million users worldwide trust in the expertise of GBS.*

## Application Services

Standard SharePoint features are not sufficient for many businesses. When integrating workflows or shaping portals, for example, individual solutions are usually more appropriate for realising specific needs. Our experts cover all aspects of application development and customizing.

### Our services

- Development of SharePoint Apps and farm solutions
- Realisation of extranet and intranet portals
- Development of workflow solutions
- Integration of 3rd party solutions and external data sources
- Realisation of ECM and DMS solutions, enterprise search and business intelligence

## Support Services

Smooth and reliable operation is especially important with collaboration platforms. And in addition to the availability of the SharePoint environment, users rightly expect support when working with a new solution or experiencing difficulties. Our teams are happy to help at all levels.

### Our services

- 2nd and 3rd level support 8x5, 24x7 or combination
- Support for SharePoint standard or individual solutions
- Incident and problem management
- Change management
- Automation of service processes

## SharePoint Trainings

Get smart! Our SharePoint seminars and workshops make it easy. Our trainers are happy to share their comprehensive knowledge of SharePoint architectures, infrastructure, application design and operation with you. Not just abstract, theoretical information but tried and true best practice knowledge, gained in real projects. Armed with this know-how, you'll be at the perfect starting point for realising your own projects.

By the way: We're at your side for any and all questions regarding licensing in general or the purchase of Microsoft licenses.
