- Increased productivity with automation of business processes
- Quick acceptance and minimal training
- Immediately usable on smartphones and tablets
- Available on premises and in the cloud (Office 365)

Professional workflow management for Microsoft SharePoint

Put an end to complicated

Now creating workflows and automating business processes in Microsoft SharePoint is easier than ever before with the GBS Workflow Manager. The Workflow Manager makes everything possible: from simple forms right on up to complex business logic.

Operation is intuitive, using drag and drop. Workflows and business applications will come to life with just a few clicks. Design the interface, model the workflow and deploy it in SharePoint. All possible even without extensive programming skills! The flexible BPMN-conform workflow engine lets you design advanced business processes in a flash.

The GBS Workflow Manager gives you precisely the flexibility you need. Our solution can be run on premises as well as in the cloud. And thanks to the mobile apps for Apple iOS and Google Android, you can use your business processes when you're on the road, too.

GBS Workflow Manager

Simply reaching goals faster

GBS Workflow Manager

About GBS

GBS is a leading provider of solutions and services for the Microsoft and IBM collaboration platform.

More than 5,000 customers and 4 million users worldwide trust in the expertise of GBS.

Seamless interplay

With the GBS Workflow Manager, workflows and forms are embedded directly in SharePoint workspaces. Thanks to the modern architecture, our solution integrates itself seamlessly as a provider-hosted add-in in SharePoint. The familiar SharePoint look and feel makes getting started easy.

Ultimately, SharePoint is enhanced with important functions for managing business processes. Including, for example, the use of workflows in SharePoint lists and document libraries.

Features	SharePoint Workflow Designer	GBS Workflow Manager
Complexity and diversity of workflows	Low	High
Graphic workflow editor	✗	✓
User friendliness	Complex operation	Drag and drop operation
Graphic status display of workflow	✗	✓
Fulfills business specific demands	Pre-conceived actions only	Easily expandable
Ready for use without local installation	✗	✓
User rights management	Limited	Extended
Debugging options	Limited	Extended

What's more: The integration with our email management solution iQ.Suite means that email attachments or information in email texts can be used directly in SharePoint. This way, attached orders in PDF format can be easily integrated in the workflow or customer ident numbers can be automatically recognised.
