Teamroom Manager

The Teamroom Manager is a comprehensive solution for creating, deploying, managing, and synchronizing SharePoint workspaces in Office 365. The main functionality consists of the provisioning of TeamSites, site lifecycle management, template generation and enhancements of SharePoint site and permissions structure.

Top Speed

Start your collaboration portal within minutes. Just install the app from SharePoint App Store and start requesting sites with a mouse click!

Self Service Portal

Enable your user to create new TeamSites (site collection based) without the need of Administrator permissions. Give them the opportunity to design their own TeamSite templates and to add changes to existing sites.

Save Money

Reduce your administrative effort by using the Collaboration Manager. Don't waste your time by creating site collections and content databases or setting user permissions in sites and site collections manually.

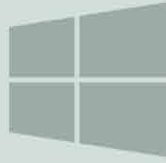

FEATURES

- /// Site Provisioning
- /// Template Engine
- /// Sync Across Existing Sites
- /// Group and User Management
- /// Office 365 & On Premise
- /// Flexible Contribution
- /// Online management console

A Site Provisioning Solution for Office 365

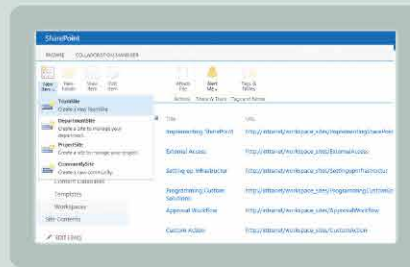

FEATURES

Template Engine

Create custom SharePoint TeamSite templates with just one click. Customize your site with SharePoint standard functionality and save the complete site as a file in a document library.

TeamSite Request

Request sites in a standard SharePoint list and add an approval workflow. Get your full functional TeamSite without any manually configuration in a few minutes and start working on your project.

Governance

Get control of your SharePoint Online environment with a custom TeamSite request process, a group and user management and apply governance rules through all your SharePoint sites.
